

[/lommy pro T]

Intelligent tracker and superior monitoring

Lommy Pro T provides a complete overview of vehicles and machines, and also provides precise monitoring

With a combination of GPS and GSM / GPRS technology, Lommy Pro T makes it easy to maintain an overview and monitor assets, driving patterns, consumption and temperatures.

Lommy Pro T gives you a high level of flexibility and functionality, even with low power consumption.

Lommy Pro T is designed to serve many purposes, e.g fleet management and theft protection. In addition equipment can be used in combination with Lommy Pro T – for even more application possibilities. The device can be installed at any location where power supply is in hand, and do have it's own backup battery.

Temperature fluctuations

Register temperature fluctuations for safe and secure transportation of temperature-sensitive products.

System integration

Easy to integrate with a multitude of cooling-systems, due to our API integration.

Efficient power management

A combined power supply provides an optimal power supply, as it uses its own battery in combination with the cooling unit's power supply.

Documentation

The system collects data from the temperature-monitoring, to serve as documentation for a course of events, troubleshooting and detection, as the basis of evidence.

Accurate positioning

Reliable and accurate positioning based on advanced GSM triangulation combined with accurate GPS positions.

Protect against theft

Track down, if lost or stolen. The technology uses a combination of GSM and GPS to ensure that medicines and vaccines are found in time if falling into the wrong hands.

Complete control and overview of your vehicles and other belongings and at the same time monitoring of temperature

Lommy Pro T is designed to serve many purposes, e.g. fleet management and theft protection. In addition, optional equipment can be used in combination with Lommy Pro T – for even more application possibilities. The device can be installed at any location where power supply is at hand.

Key features:

- Small size, great visual performance
- Benefits the user when settlement with customer
- Cost efficient for many purposes

Possibilities:

- Fleet Management
- Temperature surveillance
- Securing of loadspace
- Remote management of settings and alerts
- Recovery when stolen
